Nixon Ooi (UX Designer & Aspiring AI Engineer)

A background spanning accounting, graphic design, and UX design, built on a belief that the best digital products come from understanding people first. That winding path was not accidental; each step sharpened a different part of how I think: analytically, visually, and with empathy at the centre. That same curiosity now extends into AI engineering, where I'm learning to apply the same instinct, asking why before how, to how intelligent systems are designed and built, not just how they look and feel. I work well within cross-functional teams while holding my own independently.

Skills

Design & UX: User Research, Usability Testing, Wireframing, High-Fidelity Prototyping, Journey Mapping, Interaction Design, Information Architecture, Accessibility, Agile Methodology

Tool: Figma, Google AI Studio, Figma Make, Adobe Photoshop, Adobe Illustrator

Technical: HTML5, CSS3, JavaScript

Capstone Project

EcoPark, Smart Urban Mobility Solution 2026

- **Problem:** Urban commuters lose significant time searching for parking with no real-time visibility, creating a frustrating and inefficient daily experience for citizens.
- **Approach:** Led end-to-end for a mobile application, running discovery research and synthesising insights into user journeys, wireframes and high-fidelity prototypes in Figma. Incorporated AI assisted prototyping tools to rapidly explore and iterate design solutions throughout the process.
- **Outcome:** Validated designs through structured usability testing, achieving a 95% task success rate and a 40% improvement in theoretical travel efficiency across prototype iterations.

Experience

AI Singapore, AI Engineer (LLM Specialisation) Sept 2026 - Mar 2027

- Selected from a competitive national applicant pool for this pioneer specialisation track focused on production LLM engineering.
- Independently built and deployed a full RAG pipeline with agentic tool-calling, a FastAPI service, and production-grade observability (Langfuse) in preparation for the programme.

The Bold Company, Web Developer 2023

- Restructured user flows and developed visual assets for an e-commerce platform, ensuring design solutions were intuitive and visually consistent across all customer facing touchpoints.
- Worked closely with the founder and cross-functional teams to present design concepts, gather feedback and refine solutions iteratively to meet both user needs and business goals.
- **Achievement:** Resolved key friction points in the user journey through research informed design decisions, contributing to a projected 20% increase in user retention.

- Maintained and applied a high-fidelity design system within regulated frameworks, ensuring visual and UX pattern consistency across all digital interfaces and delivered assets.
- Worked alongside cross-functional teams to ensure materials are up to industry requirements.
- **Achievement:** Stepped in to independently cover the lead during maternity leave, maintaining established standards and ensuring uninterrupted delivery of work without disruption to the team.

Education

Manchester Metropolitan University, BSc (Hons) Web and User Experience Design 2023 - 2026

- Evaluated UI/UX interaction patterns through cognitive walkthroughs and heuristic evaluations, translating findings into actionable usability improvements across diverse user demographics..
- Explored interaction design and visual communication through storyboarding and flowcharts, building a broad foundation for conveying design ideas clearly across different audiences.
- Conducted independent user research through quantitative and qualitative methods, synthesising insights into strategic design recommendations that informed end-to-end project decisions.

Chatsworth Medi@rt Academy, Professional diploma, Advertising & Design 2021 - 2023

- Built a cross-disciplinary portfolio spanning UI/UX, graphic design and print, applying grid systems, colour theory and visual hierarchy to develop a strong and consistent visual foundation across different formats.
- Developed a sharp eye for detail down to the pixel and a systematic approach to every brief, habits that continue to shape how I work today.

Singapore Polytechnic, Diploma in Accountancy 2016 - 2019

- Focus on analyzing, and reporting financial transactions.
- Interprets financial data and ensure compliance

Professional Development

- McKinsey Forward Programme
- BCG Strategy & Design Job Simulation
- UX Design Certifications, Uxcel (listed on LinkedIn)
